

# XANA 4001

Strip Packaging System

- Incredible Speed and Exceptional Accuracy •
- Fill, Label, and Package Over 50 Pouches a Minute •

**THE PERFECT FUSION OF  
QUALITY AND FUNCTION.  
FAST, ACCURATE, EASY TO USE,  
AND BUILT TO LAST.**

**AUTOMATICALLY PACKAGE, PRINT  
AND DISPENSE PATIENT-READY  
MEDICATIONS FROM AN ARRAY  
OF 400 CASSETTES**

*Imitated but never duplicated, TOSHO  
Invented the tablet cassette packager in 1985  
and have continued to innovate ever since.*

# SETTING THE STANDARD IN CENTRAL FILL FULFILLMENT

- Precision:** Our exclusive system ensures that all cassettes and medications are properly accounted for. The system will not dispense if an anomaly is detected, making sure that the right patient gets the right medications.
- Efficiency:** From a space-saving slide out cabinet design, to predictive medication forecasting to minimize operational disruption, the Xana will revolutionize your workflow!
- Quality:** Built to an exacting degree, the Xana is a marvel of modern design and engineering, utilizing specialized anti-static and patented anti-bounce materials to ensure proper dispensing of all medications.
- Printing:** The system features an unparalleled pouch printing system. Easily match medication to patient by including all pertinent prescription information, even adding a photo ID image of the patient.
- Partnership:** Noritsu brings you peace of mind. We've been supporting our customers for over 35 years, with a nationwide technical staff for fast, reliable service.

## Further Increase Productivity With The Benjamin Tray System

For specialty medications that need to be hand loaded, the Benjamin uses an efficient LED system to speed your workflow and ensure accuracy. Each tray is RFID encoded to guarantee proper packaging. Best of all, the trays can be loaded into the Xana system without interrupting production!
